

Cooperation of a prosthodontist with an orthodontist and other dental specialists.

Under construction / Forgotten

This article was marked by its author as *Under construction*, but the last edit is older than 30 days. If you want to edit this page, please try to contact its author first (you will find him in the history (https://www.wikilectures.eu/index.php?title=Cooperation_of_a_prosthodontist_with_an_orthodontist_and_other_dental_specialists.&action=history)). Watch the page as well. If the author will not continue in work, remove the template `{{Under construction}}` and the page.

Last update: Monday, 25 Apr 2016 at 10.50 am.

Emergency/acute pain, oral surgery, perio, restorative and endodontic are all pre-requisites to having any type of prosthetic treatment

The oral mucosa/dentition should be stable, healthy state.

Orthodontic correction is required to be completed beforehand.

In fixed partial dentures this could include: Mesial/molar tipping

Crown lengthening to improve retention form
