

Forum:Seminar papers/Biophysics/2. LF/2015-2016/Group 2

Group 2:

Biophysics of hearing

Subquestions

- Biophysics of the auditory organ
- Stress-activated channels
- Hearing examinations and disorders
- Noise and noise unhealthiness
- [[]]
- [[]]

Responsibility for the page content

Subquestion (Link to the subquestion)	Developed by username (Surname, First name)	Team	Started	To be checked	Checked	Evaluation	Notice
Biophysics of the auditory organ	Sarah shakour (Shakour, Sarah)	2F	2015-12-05	2015-12-07			
Stress-activated channels	Annabelle Hampf (Hampf, Annabelle)	2H	2015-12-03	2015-12-07			
Hearing examinations and disorders	Mira.shakour (Shakour, Mira) Nadara (Nadar, Ahmad)	2H 2G	2015-12-03	2015-12-07			
Noise and noise unhealthiness	Annika Schulz (Schulz, Annika)	2F	2015-11-13	2015-12-07

Electrical biosignals

Subquestions

- Electrical activity of cells, tissues and organs
- Characteristics of biosignals
- Evoked potentials
- Native record and provoking tests (strobe light flashing, deep breathing etc.)
- Biosignal artifacts
- Electrodes for diagnostics
- Unipolar and bipolar connection
- Differential amplifier
- Time constant and filters
- Electrical biosignals/examples

Responsibility for the page content

Subquestion (Link to the subquestion)	Developed by username (Surname, First name)	Team	Started	To be checked	Checked	Evaluation	Notice
Electrical activity of cells, tissues and organs	Miral wali (Wali, Miral)	2H					
Characteristics of biosignals	Dealmeij (Almeida, João)	2G					
Evoked potentials	Alissa Kircher (Kircher, Alissa)	2E					
Native record and provoking tests	ClaraQweitzsch (Qweitzsch, Clara Sofie)	2G					
Biosignal artifacts	Gigasp (Prakash, Sherwin)	2F	2015-11-30	2015-12-07			
Electrodes for diagnostics	Rebecca Jacob (Jacob, Rebecca)	2E					
Unipolar and bipolar connection	Danaa (Ahlmarm, Dana)	2E					
Differential amplifier	Aura1211 (Boblewski, Justyna)	2H		2015-12-07			
Time constant and filter	Ppar92 (Parasram, Pranav)	2G	2015-12-04	2015-12-07			
Electrical biosignals/examples	Eva Rolfes (Rolfes, Eva)	2E	2015-12-04	2015-12-07

Evaluation of the article:

- * – this article is not good
- ** – this article could be worse
- *** – this article is good
- **** – this article is very good
- ***** – this article is excellent

Preparing subquestions

Click on your red coloured subquestion on the table above. The appropriate edit window will be opened and you will start creating the content.

Help

- Global help: Help:Contents
- Pictures: Lots of free pictures are available on: Wikimedia Commons (<http://commons.wikimedia.org/wiki>)
- Every article must have sources (bibliography); see Template:Cite/documentation how to cite sources.

Instructions

- Every wikipedia (i. e. *subquestion*) should be prepared by **one student**.
 - Only in the case when the number of students in the group is greater than the number of the subquestions is allowed that some subquestions will be prepared by two co-operated students; every of them has to edit appropriate part of the wikipedia.
- Fill your *Username* and *real name* in the column: *Developed by username (Surname, First name)*.
- Fill the date in the column *Started* when you start editing the page.
- The **absolute deadline for this seminar work is Monday, December 7th**.
- After the Wikipedia is written it has to be checked by the professor Carmel J Caruana. Then:
 - On the beginning of the wikipedia must be inserted the template:

```
{{Check|Carmeljcaruana}}
```

- Then fill the date in the column *To be checked*.
- When in doubt e-mail to: carmel.j.caruana@um.edu.mt

== From Prof Carmel J. Caruana

Dear students here are some hints on writing your wikilecture.

AT THE BEGINNING OF YOUR WIKILECTURE PLEASE INCLUDE THE FOLLOWING:

```
{{Check|Carmeljcaruana}}
```

VERY IMPORTANT Aim for quality not quantity! A lot of copying and pasting without true understanding would be easily detected by the examiner. Make sure you have some good diagrams. If it is copyrighted material, just describe it briefly in your own words, give the author and year of publication and provide a link to it.

Your wiki lecture should consist essentially of three parts:

1. Introduction

a. Start with a good definition of the terms in the title which shows that you have understood clearly what the title of your wikilecture is about!

b. Explain the definition in more detail - as if you are explaining it to a colleague who does not know it.

2. Say why it is important in clinical medicine

a. In which branches of medicine is it important?

b. What is its role in practical medicine (diagnosis, therapy, prevention etc) ?

3. Say briefly what the literature says about it. Answer a few of the following questions:

a. Are there different types?

b. What are advantages and disadvantages?

c. How does it work?

d. What is the present state of its development?

e. Are there any risks in its use?

f. Any ethical issues associated with the topic?

4. Conclusion

What future developments are envisaged in the area and what are the possible impacts on medicine?

Reference List Give 3 - 5 KEY references (not the first ones you come across but those which provide real good information and which you can recommend to your colleagues).

The following information should be given for each reference:

Book: name of at least one author or organization; title; edition; year; isbn

Article in journal: name of at least one author or organization; title; journal; pages; year; volume; issn.

Webpage: name of at least one author or organization; url.

(For more information on referencing go to <http://www.wikilectures.eu/index.php/Template:Cite/documentation>)

The seminar paper should be between 500 - 600 words long. However I must emphasize again that it's the QUALITY not quantity that counts - this means whether you have followed the structure in the 'Hints' or not. If a topic is done between two persons the number of words should be 1000 - 1200.

Dear students,

Before you submit your wikilecture go through each part and ask yourself - is this really about my topic or not? Going out of subject is one of the worst things you can do at university because it shows that you cannot focus on your particular topic. Have I written something to be proud of and be of interest to my colleagues?

Please remember the absolute deadline is Monday 7th December 2015 midnight.

If you have any questions don't hesitate to send me an email on carmel.j.caruana@um.edu.mt. The email subject should be 'Wikilectures - your name and surname'

For questions of a general nature which would be of interest to everybody please use the forum.

Best regards to all,

Prof. Caruana
