

Inhaled β 2-agonist with long-term effect

This article has been translated from WikiSkripta; ready for the **editor's review**.

Inhaled β 2-agonist with long-term action (LABA) belongs to β 2-agonists with rapid onset of action (RABA = rapid-acting beta agonists). These are relief drugs in the treatment of asthmat.

These include preparations that are both RABA and LABA, i.e. especially:

- **formoterol**'.
