

PROM

PROM is a term used in obstetrics. It is the English acronym ***Prelabor Rupture Of Membranes***, which translates into Czech as **premature outflow of amniotic fluid**.

You can also see this term in the following combinations:

- **pPROM** = outflow of amniotic fluid before the due date of delivery (p = preterm),
- **tPROM** = outflow of amniotic fluid at term of birth (t = term).

Related Articles

- Premature delivery
