

Portal: Questions for Final Examination in Dental Materials (1LF, D)

List of questions - Dental Materials

1. Dental alloys based on common metals
2. Dental alloys based on noble metals
3. Classical dental amalgams
4. High-copper and mercury-free amalgams
5. Techniques of casting metallic dental restorations
6. Stomatologic plasters
7. Inorganic dental cements
8. Phenolate-based dental cements
9. Glass-ionomer cements
10. Resin-modified glass-ionomer cements
11. Fluoride compounds in dentistry
12. Dental porcelains
13. Dental solders
14. Dental waxes
15. Investment materials for dental casts.
16. Alginate and agar impression materials
17. Silicone and polyether rubber impression materials
18. Polysulfide rubber impression materials
19. The impression compound. Zinc oxide-eugenol impression materials
20. Natural polymers used in stomatology
21. Polymethylmethacrylate and its usage in dentistry
22. Composite materials and their usage in dentistry
23. Dental restorations made of gold or gold alloys
24. Porcelain bonding metal alloys
25. Materials used for dental implantates
