Template:Split/documentation

Documentation [edit (https://www.wikilectures.eu/index.php?title=template:split/documentation/documentation&action=edit&preload=template:documentation/preload)]

The template {{Split}} is usually inserted in discussion page of article, which should be splited. The reason for splitting is often the length of the article. Parameters of this template are names of potential articles. Every article, which contains this template, is automatically sorted to category.

Examples:

- {{Split}}

> This article should be splitted into more articles.
>
> More detail information or other changes can be found on discussion page.

- {{Split|Blood}}

> A part of text should be extracted from this article and it should be used for creating a new article „Blood".
>
> Because already exists, it would be necessary use the text in it.
>
> More detail information or other changes can be found on discussion page.

- {{Split|Blood|Heart}}

> This article should be splitted into „Blood" and „Heart".
>
> Because both already exist, it would be neccessary to use the text in them.
>
> More detail information or other changes can be found on discussion page.

- {{Split|Blood|Heart|Circulation}}

> This article should be splitted into „Blood", „Heart" and „Circulation".
>
> Because the pages „Blood" and „Heart" already exist, it would be neccessary to use the text in them.
>
> More detail information or other changes can be found on discussion page.
