

Tumors of the Uterus

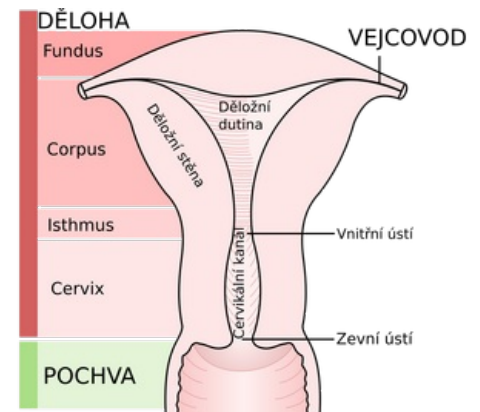

Tumors of the uterus can be divided into **2 large groups'**: tumors of the cervix and tumors of the body of the uterus. These groups are further divided into benign and malignant tumors.

Tumors of the cervix

- Benign: Endocervical polyp.
- Precancer: Cervical intraepithelial neoplasia.
- Malignant: Squamous cell carcinoma.

Tumors of the uterine body

- Benign tumors: Polyp and leiomyoma.
- Malignant tumors: Leiomyosarcoma, stromal sarcoma, carcinoma and carcinosarcoma.
