

Tumors of the musculoskeletal system

Division

1. bone tumors;
2. soft tissue tumors (they occur twice as often).

In both groups, we can distinguish between *benign*, *semimalignant* and *malignant* tumors.

Staging

- A classification system for bone tumors and their surgical treatment (1970s, by W.F. Enneking).
- *See the Staging page for more detailed information.*

Bone tumors

- Osteoma
- Osteosarcoma (osteogenic sarcoma)
- Osteoid osteoma, osteoblastoma
- Osteoclastoma (giant cell bone tumor)
- Chondroma (according to location: enchondroma, ekchondroma)
- Juxtacortical (parosteal) osteosarcoma
- Osteochondroma (exostosis osteocartilaginea)
- Chondroblastoma
- Chondrosarcoma
- Ewing's sarcoma (PNET)
- Chordoma
