Welcome to WikiLectures!

First steps

- Help articles can really help you at the beginning. Our help section is short and useful! :-)
- Please, introduce yourself on your new user page.
- If you need to experiment or test your edits, you have your own sandbox prepared.
- You can ask for our cooperation on the support page.

We wish you easy working and studying at WikiLectures!

New Articles

Hello Alex,

I would like to thank you for amount of articles from Orofacial Anatomy. I am sure, that students will preciate it. You kept the template "Under construction" in few articles:

- Nasal cavity (boundaries, sinus openings), vessels and nerves
- Ganglion oticum + ganglion submandibulare
- Anomaly of the vestibulum oris, diastema, tremata

If these articles are finished, you can remove the template.

Other articles are extremly short or contain no text. I am not sure, if you mentioned to keep them like this or you just forgot to finish them. Could you please check them?

- 1st branch of the trigeminal nerve (V1), ciliary ganglion + pupillar reflex
- Anomaly of the number and size of the teeth, supranumeric teeth (phylogenetic explanation)
- Cervical Sympathetic System

Thank you fro you time invested to WikiLectures. If you have questions or need help, you can ask me (here) or anybody from our Editorial board.
