## WikiLectures competition

Hello Panayiotis Stavrou,

it is a pleasure for me to announce that your article RNAs, Structure and Function won the **3rd place**. It is a great article which covers the topic very well. On the other hand it is a pity that it lacks some citations and some parts of the text might be confusing without additional explanation. But generally it is a very helpful article for students of medicine and it deserves the third place!

And that is not all! Your article The Major Histocompatibility Complex, HLA wins the **4th place**. It is an awesome article, but it has no citations as well. It completely lacks bibliography or references. Moreover, an article about MHC already exists at WikiLectures... However, the topic is covered in a very impressive way.

You can see other results at Forum:Competition.

Please, contact us immediately at our editorial e-mail address and we will send you more information, when and where your prize will be delivered to you :-).
