

Category talk:Categories

Just one point. Sometimes in English, this category is called Category:Root.--Juandev 00:33, 9 December 2008 (UTC)

OK, there is no problem to rename it. Even if there are various names for the root category (Root, Contents, Categories, Main category...), I chose translation of the name in czech wiki-lf1 (*by the way, what is the english translation of "Wikiskripta"?*) - Kategorie = Categories, but of course you can change it. --Slepi 12:36, 9 December 2008 (UTC)

Well, I thought "Kategorie:Kategorie" is a singlar, but it is not a problem as you say. Well, I think that Wikiskripta we can translate such as Wikitextbooks, but it is quite long:--Juandev 21:22, 10 December 2008 (UTC)
