Full-text electronic information resources

The emergence of e-journals and e-books

- the Internet and the WWW (World Wide Web) service are responsible for everything
- the expansion and popularity of the WWW brought with it new possibilities in publishing
- The 90s of the 20th century brought the question - will the classic book disappear?
- contemporary – symbiosis of classics and e-version
- the emergence of purely electronic magazines (e.g. IKAROS)
- ADVANTAGE – availability 24/7 (24 hours, 7 days a week)

Current Status - License Policy

- current and further development is determined by the license policy of the publishers
  - is based on an agreement with the user – consortium, institution, etc.
- print and online version at the same time
  - online completely free
  - free after a certain period - so-called "embargo" (ranging from 1/2 year to 2 years)
  - print subscribers - free online
  - subscribers to the print version - online for an additional fee
  - purchasing print or online version only
  - membership in companies that publish the magazine
  - consortium approaches (Springer, Elsevier, Wiley, Oxford, etc.)

Technical Terms

- PC connected to the Internet with a browser
- full texts are in the format:
  - HTML
  - PDF (Adobe Acrobat - free download)
  - exceptionally different format (image)
- ensuring access
  - direct access – IP-addresses of the institution, rarely ID and password
  - remote access - your personal ID and password

Magazine Catalogs

- file catalogs
  - records of magazines that are taken out in printed or online form by libraries in the Czech Republic - completeness depends on the cooperation of libraries
- National Medical Library – MEDVIK
- National Library of the Czech Republic - SKCP database
- catalogs of online magazines
  - 1. LF UK – Electronic journal library – EZB
  - UK - Electronic Journal Portal - SFX
  - NLK – Portal of electronic resources
- service for obtaining an article - MVS, MMVS

EZB (Electronic Journal Library)

- project of the German university library in Regensburg
- offers simple access (and especially management) of electronic journals
- you can find the availability of individual titles here
- easy search - by title, abbreviations, publisher, subject (in German), ISSN
- accessibility - "traffic light"
  - green (free source)
  - yellow (license for our organization – 1.LF)
  - red (we do not have access)

How about a magazine?

Example 1

- I have a quote:

Clinical Chemistry & Laboratory Medicine 2006, 44(7): 813-16 (Gibelin P et al: Prognostic value...)

- I will find out if 1st LF has it online
- EZB - I'm looking for "clin chem lab med" in the quick search
- appears at the magazine
    - "info" - information about the magazine
    - "readme" - info about subscription
    - "traffic lights"
- select a record that is accessible (yellow)
- I will link to the magazine page
- I will find the necessary article
- I will download

Example 2

- I have a quote:

Experimental Neurology 2006, 202(1): 21-35 (Bakker M et al: Postural responses...)

- I'll see if 1.LF has it online
- EZB - I'm looking for "experimental neurology" in the quick search
- appears at the magazine
    - "ičko" - information about the magazine
    - "readme" - info about subscription
    - "traffic lights"
- unfortunately, the journal is not accessible to us (red), but I can find out which library using EZB has it available - list of participating institutions
- I will look in the complete catalog
- National Medical Library - in 2006, it has no library in printed form
- The National Library of the Czech Republic – in 2006, there was no library in printed form
- I therefore choose the option from EZB - library - MVS service

E-resources portal – NLK

- registered NLK readers can use remote access
- NLK – SerialsSolution portal
    - https://nlk.cz/ – "electronic resources" menu
- sample – "Lancet" magazine
- when accessing outside the NLK building, you must use a login ID and password (other than when accessing UK!)

How to e-books?

- lists of e-books within the portal
    - 1.LF website, 1.LF library website – overview
- Gale demo
- sample Books@OVID
    - UK electronic resources portal - overview
- UK - ALEPH catalog
    - http://ckis.cuni.cz
- e.g. search by keyword - "psychology"
