

# Globulins

**Globulins** are a group of globular proteins of blood plasma. They can be divided into subgroups:  $\alpha_1$ ,  $\alpha_2$ ,  $\beta_1$ ,  $\beta_2$  and  $\gamma$  (or imunoglobulins).

## Types of globulins

- $\alpha$ -globulins
  - $\alpha_1$ -globulins
  - $\alpha_2$ -globulins
- $\beta$ - globulins
  - $\beta_1$ -globulins
  - $\beta_2$ -globulins
- $\gamma$ -globulins – imunoglobulins
