

Kabrhel's Index

English: *Kabrhel's Index*

Czech: *Kabrhelův index*

Kabrhels index is number of microbes, which passes through the sand filter. Limit is 1:7000 (it means that 1 microbe from 7000 microbes will pass).

Note: Gustav Kabrhel (1857–1939) was the founder of hygiene in the Czech Republic.
