

Musculus sartorius

Origin: spina iliaca anterior superior

Insertion: condylus medialis tibiae (pes anserinus major).

Pes anserinus major is a joint attachment of m. sartorius, m. gracilis a m. semitendinosus.

Inervation: nervus femoralis (z L₂–L₄).

Function:

1. Hip joint – flexion, external rotation, slight abduction.
2. Knee joint – flexion, internal rotation.

It is the longest muscle in the human body.
