

Semimembranosus muscle

Origin: tuber ischiadicum.

Insertion: condylus medialis tibiae, m. popliteus fascia, ligamentum popliteum obliquum

The bifurcated insertion of the semimembranosus muscle is sometimes also called '*pes anserinus profundus*'.

Innervation: n. ischiadicus (high split: n. tibialis).

Function:

1. knee joint - flexion, internal rotation.
2. hip joint - extension;
