

# Short-acting inhaled $\beta$ 2-agonists

Template:Heslo

Short-acting  $\beta$ 2-agonists (SABAs) are rapid-acting beta-agonists (RABAs). These are relief drugs in the treatment of asthma.

These include those preparations that are both RABA and SABA, ie:

- **fenoterol**
- **salbutamol**
- **terbutalin**

Template:Pahýl
