

# Template:TA/documentation

Inserts a template for an external reference to Terminologia anatomica 98.

## Usage

TA codes can be retrieved using: the index of Latin names of anatomical structures link here (<http://www.unifr.ch/ifaa/Public/EntryPage/TA98%20Tree/Alpha/All%20KWIC%20W%20LA.htm>), index of English names link here (<http://www.unifr.ch/ifaa/Public/EntryPage/TA98%20Tree/Alpha/All%20KWIC%20EN.htm>).

**Enter the TA code without the initial letter "A" in the TA template.** So instead of A04.6.02.002 for m. deltoideus, insert only 04.6.02.002.

## An Example

- to insert a link to the nerve fiber page, use `{{TA|14.0.00.001}}` to insert the text A14.0.00.001 (<http://www.unifr.ch/ifaa/Public/EntryPage/TA98%20Tree/Entity%20TA98%20EN/14.0.00.001%20Entity%20TA98%20EN.htm>)
- to insert a link to the muscle page, use `{{TA|04.5.01.008}}` which inserts the text A04.5.01.008 (<http://www.unifr.ch/ifaa/Public/EntryPage/TA98%20Tree/Entity%20TA98%20EN/04.5.01.008%20Entity%20TA98%20EN.htm>)
