Typo

Dear Elderine,

I've noticed, that you've started the editorial work. I really appreciate that somebody is doing it and your work could be a good example for new editors, but some things are not the same as in WikiSkripta. Especially typography. In English typography there are absolutely different rules than in the Czech typography. More information about typography can be found here. For example there is no space **between number** and symbol %... Please, try to check all articles where you corrected typo, if everything is really correct.

Thanks and enjoy your holiday!

Thank you very much for the advice. I realised some differences, but not all of them. This has been very useful, thank you very much. I'm going to correct my mistakes.

Have a nice holiday too :-)
