

# WikiLectures:Upgrade

WikiLectures have been successfully upgraded during 17th and 18th March 2012. You can enjoy some new utilities in this version.

## What is new?

WikiLectures will **run faster**. This is because a new module called ResourceLoader and new system of caching.

**Category sorting** is changed, so that subcategories, pages and images will be sorted separately.

The biggest change is a **new editor**. Edit buttons are grouped to various sections. Edit buttons for editors are separated from buttons for authors. Help is included in the editor and you can show your preview or your changes by clicking on a tab above the edit field. It is displayed immediately and there is no need to reload the page for displaying preview.

**New searching possibilities** were introduced in the new version. Do not mind the capital letters, just type what you want to search!

**Left menu** was fixed in its position. You do not need to scroll all the time.

Go through new gadgets in your preferences and choose new tools that will help you in your work.

## New functions

We loaded new functions and maybe your browser remembers the old ones. To reload new tools please press the following keys:

<b>browser</b>	<b>press</b>
Mozilla / Firefox	<i>Ctrl-Shift-R</i>
Internet Explorer / Chrome	<i>Ctrl-F5</i>
Safari	<i>Cmd-Shift-R</i> or <i>Ctrl-Shift-R</i>
Konqueror	<i>F5</i>
Opera	<i>Ctrl-R</i>

## Feedback

If anything goes wrong in the next few days, try to press the keys again. You can contact administrator on his discussion page.

What do you think about the new version? Did you realized some bug? We would be pleased if you provide us feedback (<https://docs.google.com/spreadsheet/viewform?formkey=dGdaNHVWa3pCMUxpYVBQNVY2SDBuUWc6MQ>).

Thank you very much!

**Editorial Board of WikiLectures**
